

ÖKOBALL

{Eco-logical Ball}

INSTRUCTIONS, CARE AND USE FOR ÖKO-BALL

Quick start for washing clothing:

1

Fill the washing machine with clothes to desired load.

2

Place the ÖKO-BALL or ÖKO-BALLS (if more than 10lbs. of laundry) in the center of the clothing to be washed.

3

Close washing machine door and set washing machine to desired wash cycle.

4

Remove clothes from washer when dry. Balls may remain in washing machine if desired until next wash.

HYPO-ALLERGENIC

Irritant free for those who have allergies and are sensitive other detergents. Perfect for babies and infants.

ECO FRIENDLY

The efficiency of less water being used during the washing process along with the anti-calcium effect of the Öko-Ball, lessens the resistance of the washer to warm the water in less time.

COLOR SAFE

Washes both colors and whites.

How to use

- For over 1/2 loads of laundry (approx. 10 pounds) it is recommended to use two (2) ÖKO-BALLS.
- Add the ÖKO-BALL(s) after you have placed the clothes into the washing machine and place the ÖKO-BALL(s) at the center of the load.
- For best results leave the clothes in the washing machine to soak or use the pre-wash cycle setting if available. This will convert the hard minerals found in tap water.
- For heavily soiled laundry, you may add 1/5 the regular amount of ordinary detergent with the ÖKO-BALL(s), if desired.

What you need to know

- The ÖKO-BALL(s) must dry under direct sunlight for few hours at least once per month to regenerate the micro-ceramic balls inside.
- ÖKO-BALL(s) can be used with cold washing cycle in wash machine to obtain great results.

Use warm wash cycle for clothes that cannot be cold washed.

- Separate white clothing from color clothing or wash with similar colors.
- Adding one teaspoon of table salt in the washing machine with the ÖKO-BALL(s) will raise the efficiency level of the wash.
- Never place the ÖKO-BALL in the dryer and never exceed 98 degree centigrade water.
- Estimated use of one ÖKO-BALL is 1500 washes if used everyday (or approx. 4 years).
